Journal of Safety Research Index 1969–1991

In 1969 the National Safety Council published the first issue of *Journal of Safety Research*. The Journal was designed as a vehicle for scientists and researchers to exchange their ideas and findings. Since that first issue, the Journal has undergone some changes, including its joint venture with Pergamon Press in 1980, but the intent has remained the same.

Through the years the Journal has published over 400 reports in all areas of safety. Topics covered include agriculture, consumer product, home, occupational, public, sports and recreation, traffic and highway, as well as more specialized topics. Its approach has and continues to be interdisciplinary, featuring an editorial board comprised of engineers, physicians, psychologists, sociologists, and statisticians, as well as experts in human factors, epidemiology, communications, agriculture, aviation, and industry.

The following is a chronological index of articles published in the past 23 years. If you are interested in purchasing any issues, please contact Pergamon Press.
